Realitatea Media implements Infor FMS SunSystems

Infor FMS SunSystems financial and business applications are ideal solution for medium to large organizations, for which analysis and control are a priority. LLP Bucharest is the only for Infor FMS solutions, our company had implemented this solution on Realitatea Media.

Realitatea Media is a prominent Romanian news television network, with stations such as Realitatea TV and The Money Channel in its portfolio. The primary reasons for nominating LLP were the team's expertise with Infor FMS SunSystems and their ability to meet and solve the company's specific business challenges.

Business Challenges

Following a period of significant expansion, Realitatea Media were in need of a financial system capable of integrating their entire flow of business. The new system needed to possess tools for the analysis of costs and revenues in addition to offering consistent support for decision-making

procedures.

"We chose LLP Bucharest for this implementation because they had excellent references (some of them from similar companies) and regional know-how. We were also greatly impressed by the team's level of competence with Infor FMS SunSystems and particularly by their ability to respond to our specific business challenges." Said Toni Teau, CFO Realitatea Media.

Challenges Solved and Solution

The Infor FMS SunSystems accounting modules suit a variety of industries and are widely-used by organizations needing to meet statutory accounting regulations, while consistently reporting to their corporate headquarters. Account payables, receivables, assets and general ledgers are combined on one single ledger. This simplicity of design, when combined with its multiple analytical dimensions and openness to transaction import and export, results in a powerful yet simple

accounting 'engine'.

"Infor FMS SunSystems is a very flexible solution. The Analysis code, along with other features of the product, allows us to better analyze financial results." - Cristian Folică, Financial Controller – Realitatea Media.

Benefits

"Infor FMS SunSystems allows us to centralize costs and revenues for TV broadcasts and offers a

Realitatea Media

Top Five Benefits

1. Flexible and adaptable system
2. Analysis code
3. Perfectly integrated with Infor PM Query & Analysis (formerly Vision)
4. Multiple validations for data
5. Very flexible reporting tool

performant reporting system," said Cristian Folică. Infor PM Query & Analysis (formerly Vision) is an integrated reporting tool. Infor FMS Vision provides a set of tools for analyzing and drilling down into multiple data sources using Vision Executive or Excel.

Vision is an ideal tool for senior managers, analysts and Scontrollers, who need up-to-date information from transaction data.

"The liaison with LLP's implementation team was excellent, and their expertise and efficiency throughout the various stages of the project resulted in a very quick, satisfactory completion. The cooperation was excellent and LLP Bucharest assures us of high quality maintenance for Infor FMS SunSystems," declared Toni Teau. Infor FMS SunSystems business modules are well-suited to wholesale distribution, services and other industries; and consist of a highly-configurable set of tools for purchase, inventory and sales management.

"Infor FMS SunSystems is an ideal application for companies wanting to implement a system based on cost center and offer performant tools for analyzing expenses and revenues on projects, departments or subsidiaries," added Toni Teau.

" Infor SunSystems este o soluție flexibilă, care a răspuns foarte bine la cerințele organizației noastre. Infor SunSystems oferă posibilități multiple de analiză financiară, simplificând procesele decizionale."

Cristian Folică, Financial Controller – Realitatea Media.
