

Looking for simple reports?

Try LLP's Reporting Pack for SunSystems

LLP's Reporting Pack is a powerful reporting tool developed using Microsoft SQL Reporting Services, allowing users to report quickly and easily using a standard approach to statutory reports.

LLP's Reporting Pack includes management, statutory and operational reports such as Electronic Sales Invoice Management and local statutory VAT reporting. The pack also includes debt collection functionality and enables the creation of client-specific reports

Who is it for?

- SunSystems Version 6 users
- The tool does not depend on any specific SunSystems modules

Benefits:

- Click and get an immediate report – save time
- View reports easily through a web-browser or mobile
- Publish and schedule reports easily or access them on-demand
- Email reports automatically based on user subscriptions (e.g. emails at defined times)
- Powerful drill-down reporting functionality
- Better analysis for VAT and statutory reports
- E-invoicing functionality
- No need to provide SunSystems/Vision access for every user
- Easy to use, easy to set up and update and has many possibilities for export file formats (.xls, PDF, xml, txt)

LLP's Reporting Pack includes:

Reporting and Inquiry:

All statutory required reports, such as Balance Sheet and P&L, enhanced with a drill-down capability that allows easy analysis, as well as specific management reports with rich data visualisation - charts, tables, and graphs. You can publish reports, schedule report processing, or access reports on demand. You can select from a variety of viewing formats and data sources, and export reports to other applications such as Microsoft Excel or PDF. You can also create data alerts on reports and send email messages with reported data based on customer requirements.

Sales Invoice Reporting and e-invoices:

A Sales Listing allows easy visualisation and printing of issued invoices, as well as export in XML format for electronic invoice management. In accordance with local law and the growing trend for "paperless offices", LLP has transformed the standard sales invoice into a specific format combining multiple requirements into its output.

Vat Reporting and Export for Local Statutory purposes:

VAT Reports are developed exclusively to meet statutory requirements. Information about purchase and sales operations are presented with clarity and the reports include export for local statutory purposes in the required output format. The VAT Reporting function assists end users with report checking and validation through drill-down to the underlying transactions.

Debt Collection:

LLP's Reporting Pack automates the formal procedures of credit collection. Providing unparalleled credit-management and debt-collection functionality that allows you to monitor debtors closely, track collections, analyse Days sales outstanding (DSO), and implement tight controls over cash flow.
